

## Letter of support

The European Commission has launched an urgent plea for language data to help enable cross-border communication for people affected by the Ukraine crisis.

Following the motto “crisis response without language borders”, I herewith support the donations of bi- and/or multilingual corpora for Ukrainian to/from all EU languages. The data will be used to train an MT system for translation between Ukrainian and the official EU languages.

I also fully support the decision of the European Commission to make eTranslation available for the Ukrainian language.

Sincerely,

Name            Anna Zielińska
